## 2021 Consumer Propane Tank Prices

New 1,000 gallon <i>underground tank</i>	New	\$4995.95
Magnesium anodes for 1,0000 underground tank		\$395.00
1,000 gallon propane tank	New	\$4495.00
1000 gallon propane tank	Reconditioned	\$ Call
500 gallon propane tank	New	\$3295.00
500 gallon propane tank	Reconditioned	\$2795.00
325 gallon propane tank	"As is" condition	\$995.00

New, reconditioned and "as is" tanks are sold with a high pressure regulator and have a five year warranty on valves and tank fittings. New tanks have a 20 year structural warranty

Reconditioned tanks have been sand or shot blasted, painted and leak tested. "As is condition" tanks have only been leak tested, not sand blasted or painted.

Due to weather constraints, we typically schedule installations between May 1<sup>st</sup> and November 15<sup>th</sup>. Any winter installation is temporary and will require a return visit to complete the project when weather permits. The return visit is subject to labor and additional material charges.

All installations as done on a time and material basis.

Tank installation labor rate:	\$85.00 per hour, per man
Low pressure regulator:	\$89.95
High pressure gas line:	\$3.50 per foot
Transition riser for gas line:	\$55.95-135.90 (Not all installations require risers)
Tank base blocks:	\$8.50 each (minimum of 4 required)
Dielectric Union:	\$29.95

If you own an existing low pressure regulator it can be left in service if the date code indicates that it is less than 12 years old and is dielectrically protected. If the regulator's date code is outside of the 12 year period or the regulator is not dielectrically protected, Wisconsin Administrative Code requires that it be replaced.

If you have an existing high pressure gas line it may be used subject to the gas line passing a pressure test. We use 4x4x16 solid concrete blocks as tank "base blocks". We cannot substitute customer supplied "webbed" blocks or any solid block with a thickness of less than 4 inches for use as a tank base.

**All tank sales require that Gasco provide the first fill after the tank is set.** You will be quoted a firm price per gallon for the first fill when the tank is scheduled for installation. The firm price per gallon only applies to installations made within 30 days of the scheduling date.

**I have read and agree to the above listed prices and requirements:**
